WINDSHIELD DEFENDER

Windshield Defender is an optically clear protective film that is fitted to the exterior of your windscreen to reduce damage caused by stones and road debris.

The impact from hitting a pothole could cause a small windscreen chip or crack to result in a long crack, compromising your safety. Windshield defender could save you a significant amount on insurance claims and windscreen replacements

This 100-micron film has self-healing properties to ensure that small scratches on the film become less visible.

HEAT SHIELD FILM

Heat Shield is a virtually clear 50-micron polyester film that is fitted to the inside of your windscreen.

The Nano Ceramic properties reduce incoming heat by more than 80% while blocking out the cancer-causing UV rays resulting in an extremely comfortable drive.

Heat Shield complies with South Africa's national road regulations (SABS 1191).

Customers who register their Heat Shield warranty can claim from the below additional benefits:

- R3 000 towards air conditioner re-gassing.
- R2 000 towards interior UV damage to their vehicles.
